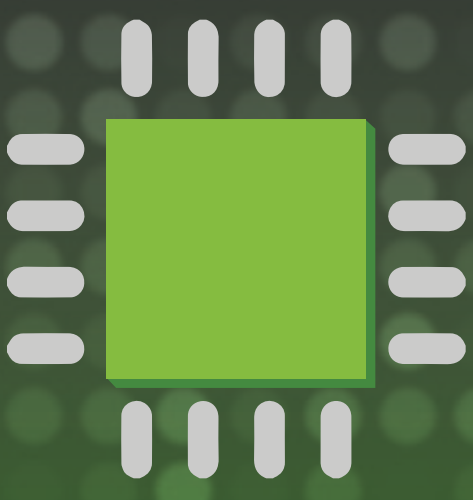
Does Your Hardware-Defined Network Make You Feel Trapped?



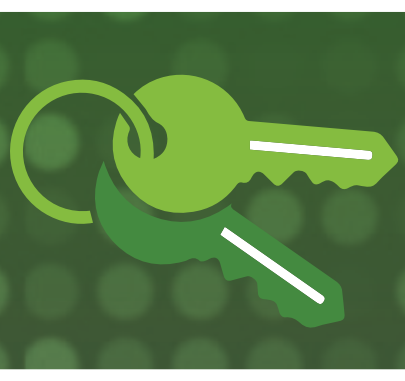
Confined by Hardware

- Networks too complex to manage[1]
- Hardware obsolete before network completed[2]
- Can't respond to faults and load changes[3]

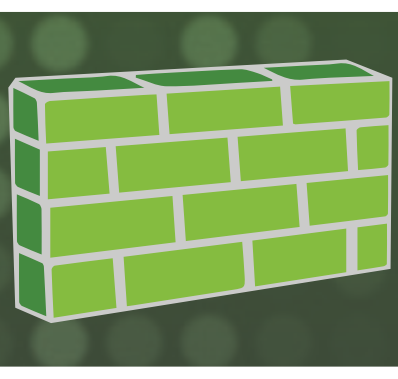
Unrestricted Possibilities With Software-Defined Networking

Find the Key

- Run any switch with the software layer[4]
- 17% using bare metal switches[5]
- Applications deployed in minutes[6]



Break Down the Barriers



- Increase Capacity without staff[7]
- 222% ROI with Software-Defined Data Center[8]

Rise Up With NSX

- NSX provisions virtual networks automatically[9]
- NSX reduces network TCO[10]

Don't Be Left Behind

- 50% will have SDN in a year[11]
- 80% implementing SDN[12]
- Top 10 strategic technology[13]

Möbius Partners Can Set You Free

Take Flight With the Best

- VMware Premier Partner
- CRN Magazine's Tech Elite 250
- HPE Platinum Partner
- Enterprise Networking Magazine's Top 10 Data Center Networking Solution Providers 2016
- CRN Magazine's Solution Provider 500

"Our whole business has transformed in the last 24 months. We had to update the infrastructure and find better, more efficient ways to support the business. We had a huge need for many more servers and we needed a solution that was efficient, auditable, and repeatable."
- Martin Vogt, Systems Engineering Manager, Rent-A-Center

Möbius Partners is proud to be part of the VMware Partner Professional Services Program (PPSP), demonstrating continued efforts to sell and deliver consulting service engagements, with an emphasis on moving customers to the software-defined enterprise.

connect. transform. repeat.
