

RISK ASSESSMENT

Review what you are doing already and identify opportunities to do better.

ARE YOU PREPARED TO PROTECT YOUR BUSINESS?

EMAIL SECURITY

Most malware is delivered via email. Do you have spam filters in place to reduce the number of suspect messages?

PASSWORDS

Have a policy in place that ensures all users change passwords regularly and use strong passwords.

SYSTEM UPDATES

Do you regularly update your operating systems and other software? Updates often include vital security patches.

DARK WEB RESEARCH

Stay informed to prevent a data breach elsewhere from spreading to you.

60% of cyber-attacks target small-to-midsized businesses.

MULTI-FACTOR AUTHENTICATION

How many layers do you have in place to protect your data? This helps you recover fast if your data is stolen.

DATA ENCRYPTION

Files in motion are most susceptible to being attacked, but all files with sensitive or vital information should be encrypted.

MOBILE DEVICE

Employee mobile devices can act like an open door to hackers. Mobile device security is critical.

BACKUP

Ensure you have a system in place that has several off-site backups of your data, both online & offline.

FIREWALL

Keep your users away from dangerous usage and intrusion by hackers.

SECURITY POLICY

Who can access your data? What authorizations and training do they need to have?

91% of cyber-attacks begin with phishing email.

WEB GATEWAY

Is your WiFi network secure? What policies do you have in place to prevent outside users from accessing your network?

MONITOR

Eyes open, always. Are you utilizing constant antivirus and scanning to prevent an attack or catch it before it does real damage?

USER MANAGEMENT

What is your policy for adding new users to your system? More importantly, are you ensuring that former employees are removed immediately?

EDUCATION

The best offense is a good defense. Train your employees about your policies and simple measures to protect data and avoid malware.

Take the worry out of protecting your data. Get started with our no-cost assessment at mobiuspartners.com/risk.
